

## Worksheet 6. Application Summary

This worksheet will be posted on the web to notify the public of requests for critical use exemptions beyond the 2005 phase out for methyl bromide. Therefore, this worksheet cannot be claimed as CBI.

1. Name of Applicant: Georgia Fruit and Vegetable Growers Association

2. Location: Georgia

3. Crop: Tomatoes

4. Pounds of Methyl Bromide Requested 2005 798640

5. Area Treated with Methyl Bromide 2005 5960 acres units

6. If methyl bromide is requested for additional years, reason for request:

There are currently no alternatives to methyl bromide for control of our target pests and there is no indication that a suitable alternative can be identified before 2006 or 2007.

2006 798640 lbs. Area Treated 5960 acres units

2007 798640 lbs. Area Treated 5960 acres units

Place an "X" in the column(s) labeled "Not Technically Feasible" and/or "Not Economically Feasible" where appropriate. Use the "Reasons" column to describe why the potential alternative is not feasible.

Potential Alternatives	Not Technically Feasible	Not Economically Feasible	Reasons
1, 3-Dichloropropene	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
1, 3-D, Chloropicrin	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
Metam Sodium	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
Metam Sodium, Crop Rotation	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
Solarization	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
General IPM	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
Resistant Cultivars	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
Crop Rotation, Fallow	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
Biological Control	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
Biofumigation	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
